

# CP Auger Screen *for C&D Application*

## ***Low Wear and Maintenance, High Reliability***

The rugged CP Auger Screen™ sizes wood, rock, metal, OCC, and other C&D materials into three cuts by using a series of cantilevered augers that do not wrap or jam, requiring very low-maintenance. Built with low-wear technology, it maintains reliable sizing at high volumes for the Construction and Demolition application.

## ***Features***

- Primary and secondary size separation
- Adjustable screen openings
- Removes smaller fraction (dirt, debris) from wood, rock, and large metal
- Rugged body designed for heavy-duty separation
- Low maintenance, minimal wear
- Reliable screening quality at high volume
- Reduces manual sorters

# CP Auger Screen *for C&D Application*

## Highest Quality C&D Separation

**When used as primary separator in C&D applications, the CP Auger Screen:**

- Increases efficiency by decreasing amount of material seen by sorters
- Increases safety by removing small fraction from sorters
- Lowers operation costs by minimizing number of manual sorters needed
- Sizes materials into Large (overs), Medium (sides), and Small (unders) fractions

### Overs Fraction

### Unders Fraction

### Sides Fraction

## Technical Specs

Body	1 deck
Rotors per Deck	8, 16
Rotor Lengths	96", 120"
Drive	Chain

## Put CP to Work for You

CP Group has over 40 years of experience manufacturing durable, dependable, and innovative recycling equipment.

As owners and operators of a MRF in San Diego, we have key insights that help our customers run a successful operation.

Put our experience to work for you.
