

LightsOut™ Air Drum Separator

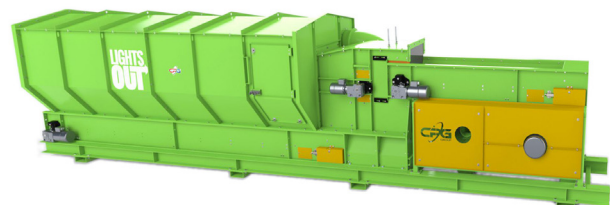

Get the Lights Out of Your Material Stream

As light weight materials become more challenging to separate from high-volume mixed material streams, an efficient sorting solution is more important than ever.

LightsOut™ ADS is the most cost-effective way to remove light from heavy materials.

LightsOut™ delivers maximum separation efficiency and processes high volumes of virtually any material. It requires no regular maintenance and no bag house.

CP Group has more than 40 years of experience manufacturing recycling equipment. Let us put our experience to work for you.

LightsOut™ Air Drum Separator

Features

- Separates light material from heavier material
- Designed to process high volumes for a wide range of material streams
- Turnkey equipment, ships ready to plug and play

Removes Light Fraction From:

- Shredded Materials, Auto Shredder Residue
- MRF Glass
- C&D

Why LightsOut™?

- Extremely low maintenance, does not jam
- Low operating cost per ton, no wear parts
- Minimal downtime
- Quiet, no vibration
- Easy to adjust for any material type
- Promotes a safe environment by containing dust
- No bag house required
- Made in the USA

Technical Specs:

Model	Infeed Width	Max Material Size	Throughput Range*
LightsOut 2400	24"	4"	4-12 TPH
LightsOut 4200	42"	8"	6-16 TPH
LightsOut 6000	60"	18"	10-30 TPH

*Throughput varies based on material density
